

Test Pumping Data Interpretationcourse
1.11.2 Participants Evaluation

No.	Question 1 Score			Question 1: Did the training course meet your expectations?	Question 2 Score			Question 2: What do you think about the overall length training course ? Considering the limits on your time and the topic discussed?	Question 3 Score			Question 3: How the relevant was the training workshop to your organization or project's need?
	1	2	3		1	2	3		1	2	3	
1				Completely/Training course was very good and solved most of our problem ,but not focused on topics				Too Short/due to importance of this topic,time was too short,only focused on introduction part				very relevant/Acoording my fied and I fully and really appreciated such a training course
2				Partially/pumping test part is important part of Hydrogeology,due to shortage of time not possible to leaned a lot,but we learned partially				Just right/time was just right ,but according time table training course covred our need and solved some of our problems				Very relevant/hydrogeology is wide field and pumping test is one of the topic and most important.
3				Not at all/Because the pumping test issues are so comprehensive and it was compressed on two days???				Too Short/ time was too short and it was useful for me				Very relevant/I am teaching the hydrogeology for students and it was very relevany for me
4				Compeletly/				Too short				very relevant, and need for our GW project
5				Completely				Just right				very relevant,to much useful
6				Completely/,it was great,because it helped us a lot to improve our ability				Just right,this was the best than the other courses,due to time management				very relevant/ to my field and helped me a lot
7				Completely/ we learned many new things				Too short/not too much effordable with out practical,but theoritical was good				Very relevant/I am assitant professor and teaching hydrogeology,it is important for me
8				Compeletly/ It was so good and we learn a lot of things,before we did not know,thanks a lot				Too short/Because the programs was so good and the time was so short,if is it long it will be useful				Very relevant/ it mach with our jobs and with our knowledge.
9				Partially/ with this training course we solved some of our problems in the field of pumping test.				Too short/This course was very good but time was too short.				very relevant/it was very proffessional and hope to do all our best in this field
10				Partially/ partially coverd some of our problems,since pumping test interpretation is difficult and important				Too short/Due to importance of this topic,time was too short				Very relevant/I am fully engage in ths field it is important for me
11				Completely				too short/				Very relevant/we are hydrogeologist and we can use all pumping test methods
12				Partially/ itwas very excellent and most of our problems are solved				Just right/time was short and all topics was very complicate and needed to work on it				very relevant/linked fully with our field and really helpful in a future
13				Partially/such a kind of this training course is good for capacity building				Just right,we need more time in a future and it is very good				Very relevant/we are hydrogeologist some time we face with problems during pumping test operation and interpretation
14				Not at all/Because the pumping test issues are so comprehensive and it was compressed on two days ,not possible to cover and solve all problems				Too short/this topic was new for me,time was so short				very relevant/it was according my field ,only we need more time and pracal part
