Q#1-List: Why should we use GIS in development work?

GIS has been used for:

- ☐ Better analysis, planning and output
- ☐ Safe resources
- ☐ Shows huge information in a piece of paper
- ☐ Accessible to public
- ☐ Easy data sharing/ generation

Easy decision making

Q#2-What are main constraints today ?

The main constraints are:

- ☐ Lack of data/ accurate data
- ☐ Lack of data sharing / policy
- ☐ Lack of coordination
- ☐ Lack of collaboration
- ☐ Existing of ideal data
- ☐ Lack of well responsible organization for Geo-data check, filter, standardization, management, storage and distribution

Q#3-How can we use GIS more effectively in Afghanistan tomorrow?

a. What can we do

b. What do we need support from government to do

A:

- ☐ Coordination
- ☐ Collaboration
- ☐ Data sharing

B:

- ☐ Capacity building programs
- ☐ Conduct GIS meetings, workshops, forums and conferences

Q#4-What recommendations would you sent to Government with advice for steps for positive change?

- ☐ Support of the AGCHO to act as an responsible organization in future
- ☐ Development of data sharing policy
- ☐ Establishment of GIS User Association
- ☐ Identification of the experts
- ☐ Support of Geosciences faculty/ establishment of GIS Lab
- ☐ Establishment of the GIS Lab within governmental institutions
- ☐ Establishment of data bank

Q#4-What recommendations would you sent to Government with advice for steps for positive change?

- ☐ Provision of the data to the organizations, researchers and collection of the data back
